Omlet Is Shutting Down...

OmletPro Today at 2:00 AM

📢 Attention, @everyone! Important Announcement 📢

It is with heavy hearts that we announce the unfortunate news regarding the future of Omlet Arcade. After careful consideration of the company's situation, we have made the difficult decision to proceed with the shutdown and our last day of operation will be this Friday **(June 30, 2023)**

We want to inform you that the last day to withdraw 20000 Jewels from your Omlet Arcade account will be on Wednesday **(June 28,2023)**. After this date, the option to withdraw funds will no longer be available. We kindly request all users who have at least 20000 jewels in their Omlet Arcade account to initiate the withdrawal process before the specified deadline.

Omlet needs actual good content...

Hear me out. 85% of posts on here are memes.
I'm going to change that at least for my account.
Will be continuing to post on here and on my other socials some shorts and videos if I can. If you've seen my shorts you probably would change your mind. Much hard work is put into this. Thanks

Omlet has a problem... :/

Omlet has a problem...
I hate to complain but...
Moderation has ultimately struggled since 70M Downloads.
I've been seeing botted accounts.
Toxic communities are forming.
85% of posts are memes and unoriginal or found on Pinterest
I even see an occasional nsfw post or almost nsfw post by scrolling down on main page.
There is no filter at this time for creating new accounts on PC (you can literally create a fresh account with inappropriate username)
Moderation hasn't done enough sadly.
I feel as if omlet failed us and might have failed to notice this. It needs to be fixed.
Most of the bigger creators have left even before this got worse.
I don't know about you guys but I'm leaving.
Omlet just wants your money

Minecraft

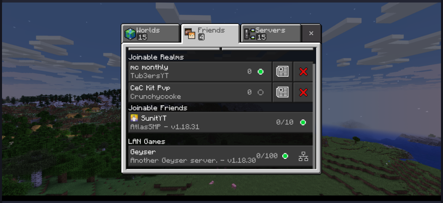
I figured out how to run a Java and bedrock server on phone!



There is still a lot that needs to be done to make it *professional*
But it actually runs!!
It runs the latest Minecraft version at this time of 1.18.2
which converts to 1.18.30 and 1.18.31 to bedrock clients
I managed to get it bedrock edition support!
This is pretty epic, but I don't know if it's ideal for bigtime server.
It was me just fooling around with server software and experimenting with it.
I have 2 options:
Port forward which is a mess

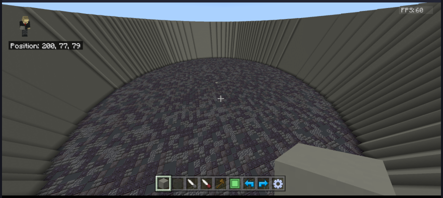
Comment What blocks I should use for the next PVP arena map!



So far this is a template, not really happy with it yet.

I need ideas for what blocks I shall use for the floor and the walls!
At least 3 or 4 different blocks for the floor
And 3 or 4 for the walls.
Comment what you think I should use!

How to vote:
Comment this:
Floor: [3 or 4 different blocks go

Woodgang is Back!

After some reconsideration, I planned to bring the squad back.
Requirements:
Must be following the squad and my account to join
the squad. I hand-pick individuals who I think should be in the squad.
The old requirements was 1k I remember.
Don't worry about that :)
But anyways, Show me what you got guys!

Minecraft

A lot of unexpected good and bad things are going on...

Honestly, I didn't expect this Many people would enjoy the content I try and stream.
The cubecraft streams are really fun and good for engaging with you guys, playing with veiwers and such.
I keep trying my best to keep up with y'all's ideas on what I should do.
I still want my own ideas to come into play though.
The real stress is dealing with 5 or 6 open dms at a time and on the other end friends/veiwers expecting a fast response, especially when streaming.
Stream chat just flies by when you have 12+ important veiwers to talk to. You are people that are very special to me :)

The Stuff I usually stream:
Minecraft: Hosting and streaming on one of my worlds
Minecraft: Cubecraft streams

Stuff I could stream:
Cod mobile
Roblox
Pojav launcher
Amongus

Minecraft

Sunkitpvp might be finished real soon...

Ah yes, another PVP server.
I was wondering if I should publish this memory here.
Not only pictures of it.
Possibly the map.
It depends really, But I might post the map in a couple few days. (I said might, lol).
All gamemodes seemed to be finished.
I did however plan to make a quads (2v2) mode.
Unfortunately, that mode has been reserved for another server/world possibly.
I feel like the world is complete in some ways.
I am not the only one that has worked on this big project. I could say I had a little bit of help.
But I managed to make more friends while making it.
If I can, I will list the people that helped, if I post the map. I might move on from this awesome project.
I may still host it time to time.
Be aware, there might be bugs I am unaware of.

PVP Functions Pack Version 2 Update!

> https://drive.google.com/drive/folders/1fmb6l6oiweUlQ040HovzwkcHvPYhXE1Z
> Jacob's Add-ons - Google Drive

Added new help section and now the display will always be on the actionbar if you have hud tag
If you have any questions DM me

163 Views 5 Likes

jacobtheboss3g
1/30/2022

Update coming soon to pvp Function pack!

most likely going to add the display as repeat always so no commandblock needed.
The only thing you will probably have to have is the hud tag and a working kill counter with the kills objective added.
That and Maybe a help section for it on how to properly use it for next update
